# About

## Climator International

We Build Cool Homes

Climator is here to keep you calm and relaxed with affordable modern Central A/C systems for all homes.

Due to consistent weather changes, air conditioners are becoming the utmost priority and may be the basic need for the residents as a comfort appliance used in domestic, commercial, and industrial levels.

Adding central air is easier and less costly than you might think. If you don't have ducts, you can't imagine how they're going to be added without destroying the house and costing a bundle.

Central air conditioning gives you the comfort of temperature control more efficiently than a split unit. A split unit can cool a single room fairly well, but if you need a few throughout the house, the energy costs can stack up fast.

## SERVICES

## A/C CONSULTANTS & SERVICES

Ducted Central A/C Installation for Home & Office. Whether summers are really getting hotter or we've lost our tolerance for heat as we grow older, lots of us are tempted to yank out noisy, dripping window/split air conditioners and replace them with quiet, efficient whole-house central-air-conditioning systems..

## ELECTRICAL CONSULTANTS & SERVICES

Climator provide a bespoke electrical design so that the quality and efficiency of the equipment are not compromised while we go for the most economical electrical appliance solution. Climator have a wealth of highly experienced technicians and engineers in our electrical department.

## SOLAR ENERGY CONSULTANTS & SERVICES

We work with clients to research & understand their requirements to create versatile electrical gadgets using renewable energy sources. We are happy with a bunch of smart clients who slash down their energy bills and go environmental-friendly with Climator.

## **PAINTING CONSULTANTS & SERVICES**

Climator have a team of painters with years of experience in the field, led by senior supervisors and inspected by interior & exterior designers. No matter whether the site is interior or exterior, the surface is even or uneven or the corners are closer or farther; paint-slingers of Climator will get the job done for you within a stipulated time.

## PLUMBING CONSULTANTS & SERVICES

Climator's plumbing service team have professionally trained technicians and labourers for your home's interior, electrical and furnishing works. Climator's team is empowered by site engineers who will ensure quality without compromise. Now, if it's a leaky pipe or drain water block, you can rely on Climator for an easy and fast solution.

## INTERIOR DESIGN CONSULTANTS & SERVICES

Climator can turn your interior into a zestful and sparkling one without the limitations of the symmetrical or radial balance of different indoors. The idea is to make your interior flawless, crafted for perfection. We cater to all demands for revamping old interiors in homes and workplaces. Get in touch with us, and craft something beautiful for a lifetime!

## **DUCTED CENTRAL AIR CONDITIONING**

In India it is uncommon to see central AC in residential homes. Climator International make it possible to procure an energy-efficient and economical ducted centralised air conditioning system for a household application. Central AC is reliant on the ductwork that connects to each individual room/space to ensure proper cooling.

# BENEFITS OF DUCTED CENTRAL AIR CONDITIONING

# BENEFITS OF CENTRAL AIR CONDITIONING

# **Ducted Centralised A/C PROJECTS**

## KALOOR – 1500 sqft 3 Bedroom Flat

1,500 Sqft, 3 Bedroom Flat converted to Centralised A/C. The entire flat has only 2-Tone Daikin Ducted A/C Unit and distributes the air through Ceiling mounted ducts that can be controlled independently in each room. As well as controlling the thermostat and turn off the A/C in each room.

## NUPAL Remedies (Kamilari) – Head office, Ernakulam

## Villa– Ongoing Project, Maradu

## **FRESH AIR SYSTEM**

Ventilation systems bring in fresh air from the outside and push out unwanted airborne particulates to create cleaner, fresher, and healthier indoor air. Healthy and fresh indoor air is key to a good quality of life. It is much nicer to work when the quality of the air is good without a constant need to open the windows and go home to fresh air. We offer Fresh Air solutions for homes and offices.
